TMS Payware Connect VAR Sheet

TMS processes Credit and Gift Cards through Payware Connect. PAYware Connect™   is a highly configurable web-based payment gateway service that enables credit   payments to be processed from TMS with an Internet connection. There's no equipment, software, or payment engine to set up and maintain, and it supports multiple payment processors in a real-time environment.

TMS is validated with Payware Connect using Chase Paymentech; First Data North (CardNet); Elavon; Heartland.

Please have your merchant services forward the following VAR to support@computersystemsint.com.

VeriFone requires a valid credit card or ACH form on file to process the monthly charges.
Please fill-out the following secure form to provide credit card use invoice# 1234 and amount $0.00
https://computersystemsint.com/Account/directorder

Or use the following form to send your bank ACH details.
http://www.computersystemsint.com/pdf/ACH_Agreement.pdf

Please allow up to 48 hours to setup new Payware Connect Account. We can't setup new account without card on file or ACH details.
Upon successful completion of the Payware connect account, TMS will be configured by CSI tech support to process credit card.
